

OIL GEOPHYSICAL PROSPECTING

Vol. 34 No. 1~6 1999

CONTENTS

No. 1

- Prestack depth migration based on both plane wave synthesizing
and Fourier finite difference *Zhang Shulun and Sun Peiyong* (1)
- Seismic trace inversion using borehole restraint and chaotic control
..... *Zhang Xiangjun et al* (8)
- An inversion method for obtaining dual parameters of wave equation
and its application *Liu Cai et al* (14)
- Wavelet spectrum and its ability to characterize harmonic signals
..... *Xu Yixian and Wang Jiaying* (22)
- Transversely isotropic parameter inversion using Hopfield neural network
..... *Zhang Wensheng et al* (29)
- A new technique for high resolution 3-D seismic data acquisition
..... *Liu Zhenxia et al* (37)
- Absorptive boundary condition in elastic-wave numerical modeling
..... *Dong Liangguo* (45)
- Two novel depth-domain frequency spectrum analysis methods for logging data
and their application to sequence stratigraphy research *Chen Maoshan* (57)
- Cause of mount-shape gravity anomaly and the method to remove it
..... *Mao Xiaoping et al* (65)
- Classification and evaluation of local aeromagnetic anomaly bodies in the Tarim
basin by self learning pattern recognition *Liu zhan and Xu Bingru* (71)

• EXPERIENCE •

- Research on the processing technique for high-resolution 3-D seismic data
from Qinhuangdao 32-6 structure *Lin Jiwu* (79)
- A prediction method for permeable sand bed in land facies formations
..... *Chen Yongbo et al* (93)
- Differentiating in space domain and its application to 3-D seismic
data interpretation *She Deping et al* (99)
- Seismic character of Aershan shallow gas reservoir in Erlian basin *Zhang Delin* (107)

• CONTENTS OF OTHER GEOPHYSICAL JOURNALS •

- Geophysics*, Vol. 63, No. 5, No. 6, 1998 (119)
- Geophysical Prospecting*, Vol. 45, No. 1~6, 1997 (120)

• PERSONAGE •

- Geophysicist *Wang Xiwen* (insert 1)

• NEWS •

- CGE of CPS Schedules 1999 geophysical events in China (28)
- Contributors (122)

No. 2

- Research on acquisition method for high-resolution dompressional waves
..... *Chen Daohong et al* (123)
- A new method for Curie interface depth inversion using ΔT anomaly
..... *Wang Bingzhu et al* (137)

Transmissive and reflective tomography of dual-borehole and surface seismic data	<i>Song Wei et al</i> (148)
Computaion of seismic travel time	<i>Wang Huazhong et al</i> (155)
Seismic characteristic obtainment using wavelet transform is applied to recognition of palaeoerosional valley	<i>Yu Bo et al</i> (164)
Research on sedimentary facies, logging facies and seismic facies of meander sand body and its prediction; an example of Chengdao area in south Bohai Sea	<i>Yang Fengli et al</i> (171)
Integratively quantitative method for fracture analysis of Ordovician system in Lunnan area	<i>Zhu Qingjie and Wang Bo</i> (180)
Joint 2-D inversion of magnetotelluric sounding data having landform effect	<i>Zhang Xiang and Hu Wenbao</i> (190)
Geological effect of high-accuracy gravity prospecting in complicated landforms	<i>Yang Hui et al</i> (197)
The influence of geophone tailcone structure upon acquired seismic signals	<i>Xu Jinxi et al</i> (204)
• EXPERIENCE •	
Research on synthetic three-component reflection seismograms in dynamite source condition	<i>Yao Chen et al</i> (210)
Noise-deleted tracing fitting method; fitting a zero-offset section by using the correlativity of seismic reflection wave	<i>Hu Zhongping</i> (218)
Seismic data compressing using 2-D <i>M</i> -band wavelet transform	<i>Tang Xianghong et al</i> (227)
New knowledge of non-infinite three-electrode profiling	<i>Zhang Tianlun et al</i> (235)
• CONTENTS OF OTHER GEOPHYSICAL JOURNALS •	
<i>Geophysical Prospecting for Petroleum</i> , Vol. 37, No. 4, 1998	(247)
<i>Geophysical Prospecting</i> , Vol. 46, No. 1~4, 1998	(247)
• PERSONAGE •	
Geophysicist <i>Liang Guanghe</i>	(insert 1)
• NEWS •	
<i>Oil Geophysical Prospecting</i> has been taken as a statistical source of scientific and technical theses for ten years running	(179)
Contributors	(248)
No. 3	
Analysis of dynamite source pattern in compressional wave exploration	<i>Wang Weihua</i> (249)
Azimuthal AVO in anisotropic medium	<i>Liu Yang and Dong Minyu</i> (260)
Catastrophe theory and its application to hydrocarbon prediction	<i>Xiang Xiyong et al</i> (269)
3-D wave equation prestack numerical simulation using the absorbing boundary condition that needs weighting-directional correction and interpolation prediction	<i>Luo Daqing et al</i> (275)
Multi-fractal spectrum behaviour of fault system and its application	<i>Liu Xiaodong et al</i> (285)
Ultrasonic test of loose sandstone and the result analysis	<i>Zhou Jihong and Zhang Chengguang</i> (290)
Evaluating exploration of complicated lithologic oil reservoir and its reserve	

estimation	<i>Chen Shuwei et al</i> (295)
Aphroid structure style in fold overthrust belt in Kuche foreland area	<i>Hu Xueping</i> (302)
Preliminary analysis of structural styles in the west Zengmu basin	<i>Cheng Ling and Pan Shenping</i> (309)

• EXPERIENCE •

A convenient accurate method for defining the geometry library of field observation system	<i>Zheng Weirong</i> (319)
A technique for noise elimination using operator extrapolation in f - x domain	<i>Cai Jiaming et al</i> (325)
Choice of initial wave impedance value and the multisolution of seismic trace inversion	<i>Ma Jinfeng et al</i> (332)
Technique for 3-D seismic data acquisition in surface-complicated plain	<i>Zhao Junguo et al</i> (341)
Reasonable methods for high-resolution seismic exploration in Luoduxi mountainous region in Sichuan basin	<i>Luo Renze et al</i> (351)

• PERSONAGE •

Geophysicist <i>Li Luming</i>	(insert 1)
-------------------------------------	------------

• NEWS •

<i>Petroleum Science</i> starts publication	(259)
Liaison Beijing office SEG, 1st academic meeting in 1999	(361)
Contributors	(362)

No. 4

Derivation and analysis of partial derivative matrix in resistivity 3-D inversion	<i>Wu Xiaoping and Xu Guoming</i> (363)
An effective method to suppress acoustic wave and high energy noise frequency-divisionally and adaptively	<i>Cai Xiling</i> (373)
Direct computation of multidimensional seismic instantaneous informations	<i>Ni Yi et al</i> (381)
Reservoir parameter prediction using Bayes-Kriging estimation technique	<i>Gao Meijuan et al</i> (390)
Early reservoir description in fault-block oil field exploration	<i>Wang Jiang et al</i> (398)
High-resolution processing technique for geophysical logging data	<i>Zhou Yuantian and Fu Yousheng</i> (408)
Experimental research on full-wave train acoustic logging in carbonate formation	<i>Zhou Jihong et al</i> (415)
Relations between fluid viscosity and attenuation, modulus or velocity dispersion in porous sandstone	<i>Xi Daoying et al</i> (420)
A method for improving the resolution of apparent resistivity curve	<i>Song Weiqi et al</i> (426)
A method for estimating the magnetic anomaly of an uniformly-magnetized polyhedron	<i>Jia Chunsheng</i> (430)

• EXPERIENCE •

In-phase stacking: a method to reduce arc phenomenon in seismic migration	<i>Zhang Zhirang and Zhang Zhenping</i> (436)
Converted-wave velocity analysis by velocity-variable trace gathering	<i>He Zongqiang</i> (442)

3-D velocity computation using spatial mesh	Wu Zonglai et al(448)
An improved technique for prestack noise elimination	Cheng Quan(453)
The Influence of shallow lateral velocity variation upon deep velocity analysis	Xu Changlian et al(457)

•SUMMARIZATION•

The latest development of exploration geophysical techniques: a summary of 68th SEG annual meeting and 1998 international exhibition	Wang Bingzhang(465)
---	---------------------

•CONTENTS OF OTHER GEOPHYSICAL JOURNALS•

<i>Geophysics</i> , Vol. 64, No. 1, No. 2, 1999	(488)
<i>Geophysics Prospecting</i> , Vol. 46, No. 5, No. 6, 1998; Vol. 47, No. 1, 1999	(489)

•PERSONAGE•

Geophysicist Zhao Zhenfei	(insert 1)

•NEWS•

OGP is one of China's 500 scientific and technical journals whose articles are quoted most frequently	(407)
15th HKT meeting will be held in Chengdu, Sichuan in April, 2000	(425)
Contributors	(490)

No. 5

Non-minimum phase wavelet obtainment based on high-order accumulated amount	Shi Dianxiang et al (491)
The reason why null space occurs in statics estimation using Monte Carlo technique, and the solving method	Lin Yihua et al (500)
Converted-wave synthetic seismogram and its velocity inversion method	Ma Jinfeng et al (509)
Determining the anisotropic parameters of fractured formation by using P-wave interval moveout	Dong Yuan and Yang Huizhu (520)
Estimating the original geothermal conductivity of sedimentary rock in hydrocarbon- bearing basin by using geophysical logging data	Wang Liangshu et al (526)
The estimation and fast inversion of all-time apparent resistivities in long-offset transient electromagnetic sounding	Yan Liangjun et al (532)
Wave-field conversion method for transient electromagnetic field	Chen Benchu et al (539)
Quasi wave equation migration of transient electromagnetic field	Chen Benchu et al (546)
Multivariate geologic statistical method for horizontal reservoir prediction	Liu Guoming et al (555)
Fault analysis and fault correlation in seismic section	Liang Shunjun (560)

•EXPERIENCE•

The influence of thin interbedded-reservoir upon the waveform of full wavetrain acoustic logging	Li Changwen (569)
Geotemperature field estimation and hydrocarbon reservoir prediction in an area of southeast Songliao basin	Li Yan et al (577)
Application of fuzzy pattern recognition to transient electromagnetic data interpretation	Song Weiqi et al (584)
The characteristic and geological meaning of Curie isothermic surface under the Tarim basin	Li Qingchun and Xu Bingru (590)
Target inversion of seismic data under the restrictions of logging	

and structural data	<i>Huang Handong et al</i> (595)
•DISCUSSION•	
How to solve Y2K problem of software projection in petroleum industry	<i>Zhang Zhengyu et al</i> (601)
•PERSONAGE•	
Geophysicist <i>Yao Fengchang</i>	(insert 1)
•NEWS•	
Professor Mr. Yuzuru Ashida of Kyoto University of Japan visited Bureau of Oil Geophysical Prospecting	(583)
Contributors	(606)
No. 6	
Fracture detection using the travel time of 3-D reflected compressional wave	<i>Liu Yang and Wei Xiucheng</i> (607)
Optimization problem of seismic attributes in hydrocarbon reservoir prediction	<i>Ni Yi et al</i> (614)
Instantaneous attribute analysis based on orthogonal basis of compact supported wavelets	<i>Zhang Haijiang and Liu Wenlin</i> (627)
Random noise elimination using wavelet analysis and inversion	<i>Zhang Bo et al</i> (635)
Stratigraphic absorption compensation based on time-frequency analysis	<i>Bai Hua and Li Kunpeng</i> (642)
The response characteristic of resistivity log in anisotropic formations	<i>Wang Hongnian et al</i> (649)
The experimental anisotropic analysis of P-wave and S-wave attenuations in cropping sandstone	<i>Li Yalin et al</i> (658)
A method for extracting velocity parameter in transversely isotropic medium	<i>Wang Yong et al</i> (665)
Seismic data acquisition system using ocean bottom cable: quality evaluation of first-break secondary positioning result	<i>Jiang Ruilin</i> (670)
Physical model experiment of wave field characteristic relating to reservoir fractures	<i>Zhang Fan et al</i> (675)
Compressive-torsional structure system and hydrocarbon accumulation in the Tarim basin	<i>Yang Chunlin</i> (682)
•EXPERIENCE•	
The datum problem of time-depth conversion and depth migration in complicated-surface area	<i>Qian Rongjun</i> (690)
A method for deriving rock diffusion coefficient from acoustic interval transit times	<i>Fu Guang et al</i> (696)
Application of development seismology to horizontal reservoir prediction within T2×1 region	<i>Fu Guoqiang et al</i> (703)
A new method for seismic lithologic prediction	<i>Zhang Yingbo and Zhang Jidong</i> (711)
Seismic monitoring research on waterflooding in thin-interbedded reservoir	<i>Yun Meihou et al</i> (723)
