

OIL GEOPHYSICAL PROSPECTING

Vol. 36 No. 1~6 2001

CONTENTS

No. 1

- Analysis of attenuation by earth absorption *Ling yun*(1)
Joint tomographic imaging for cross-hole seismic velocity and Q value
..... *Yan Yousheng et al*(9)
A notable structural pattern in buried hill prospecting *Lu Gangchen*(18)
Application of cluster division in FMI logging data *Zhang Lili and Liu Bo et al*(26)
A method for making synthetic seismogram by considering amplitude
versus offset(AVO) *Wang Xuejun and Ma Jinfeng*(30)
Effective elastic constant of fractured medium *Liu Enru and Zeng Xinwu*(37)
Application of blurring attribution in layer marking *Han Daofan et al*(45)
Suppression of single-frequency interference wave in time domain
..... *Gao Shaowu et al*(51)
Fitting a zero-offset seismic trace in time-frequency domain *Lu Wenkai et al*(54)
Effect of special plastic deposition body on structural deformation and
trap forming in western of Kuche Depression *Zhang Zhensheng et al* (60)
Direct arrival,ghost wave and water column reverberation on sea-bottom
multi-component data *Wang Weijia*(72)
Frequency-shared processing and reconstitution of seismic data in wavelet domain
..... *Wang Xiwen et al*(78)
Application of 3-D prestack depth migration in prospecting for Qianmiqiao
buried hill and its effect *Zhu Wenliang et al* (86)
• **EXPERIENCE** •
Fracture detecting by four-component VSP data from S-wave source
..... *GaoXiqin et al* (93)
Seismic reflection anomaly and its meaning in east fault horst zone,Salikuotan
..... *Hu Xuepin* (100)
Analysis of height departure and its correction in seismic section with high
dipping anticline *Liang Shunjun and LiangShunbin*(105)
• **DISCUSSION** •
Pondering on several common problem of seismic data application
..... *Chen Guangjun and Zhang Shanwen*(115)
Don't follow blindly wide azimuth 3-D acquisition—what on earth
is “full 3-D acquisition”? *Li Qingzhong*(122)
Contributors (134)

No. 2

- Constrained tomographic inversion for near-surface velocity
..... *Li Jiakang and Yu Qinfan*(135)

Wave equation datuming by wave field extrapolation based on hybrid method	<i>Zhang Wensheng et al</i> (141)
BISQ model for fluid-filled,porous medium	<i>Yang Dinghui and Chen Xiaohong</i> (146)
Argument on wave equation of spherical wave	<i>Xiao Jianhua</i> (160)
Processing method study for time-lapse seismic exploration	<i>Ling Yun et al</i> (173)
Phase velocity of elastic wave in stratum with two group of vertical oriented fracture	<i>Gui Zhixian et al</i> (180)
Anisotropy in reservoir sandstone	<i>Xi Daoying et al</i> (187)
A learning method for evolutionary neural networks and its application	<i>Peng Zhenming et al</i> (193)
High-resolution velocity analysis by phase correlation statistics	<i>Wang Deli et al</i> (198)
Normal fault plane pattern and associated fold in upside and their meaning in oil-gas exploration	<i>Li Xiaoqing et al</i> (205)
Block model-building and ray-tracing in 2-D complicated medium	<i>Xu Guoming et al</i> (213)

• EXPERIENCE •

Brief analysis of secondary positioning system in seismic sea-bottom cable acquisition	<i>Zeng Xiangyi and Yang Wenyan</i> (220)
Design of 3-D double even-odd small bin geometry and its application	<i>Fan Guozeng</i> (227)
Field test for increasing in down-propagation energy to deeper layer and its theoretical analysis	<i>Wang Yonggang et al</i> (231)
Application of seismic coherent analysis technology to prediction of fractured reservoir	<i>Liu Chuanhu</i> (238)
Potential in 3-D seismic data reprocessing and interpretation; more knowledge of South Block of Wen 215 in Dongpu depression	<i>Hu Xueping et al</i> (245)
Character of seismic information in Baikouquan reservoir; comment on seismic information on alluvial fan reservoir	<i>Zhang Delin</i> (252)
Contributors	(262)

No. 3

Seismic acquisition technique for high-resolution	<i>Zhao Diandong et al</i> (263)
Analysis of signal-to-noise ratio for irregular interference	<i>Ling Yun</i> (272)
Determining forming period of restrained seal action of undercompacted concentration caprock by using interval travel time data and its research meaning	<i>Fu Guang et al</i> (279)
Using log data for predicting oil-gas production capacity of Keshang Formation reservoir in eighth block,Kelamayi oil-field	<i>Tan Chengqian et al</i> (285)
Stable pre-stack depth migration method with Born approximation	<i>Chen Shengchang et al</i> (291)
A new method for refraction statics in CMP domain	<i>Zhang Jianzhong et al</i> (297)
AVO analysis for gas-reservoir with high-impedance sand	<i>Wang Daxing et al</i> (301)
Empirical relationship among elastic modulus,porosity,clay content,effective pressure and temperature in dry core sample of sandstone	<i>Yun Meihou et al</i> (308)

- Geoid status in southwest region of Tarim Basin and its effect on precision of
oil geophysical prospecting *Lei Yingchun and Wang Mingshi* (315)
- Prediction of fractured oil-gas reservoir in basement-buried-hill by using
multi-field information; CB buried hill case
..... *Yang Fengli and Zhang Shanwen* (319)
- Application results of gravitational and magnetic in oil exploration
..... *Ji Liansheng and Shi Fusheng* (326)

• EXPERIENCE •

- Application of logging-restrained inversion in reservoir prediction of
Chengdao Oilfield *Gao Xilong et al* (334)
- Sequence-stratigraphic framework and oil-gas accumulation rule in Songliao Basin
..... *Zhu Jianwei et al* (339)
- Volcanite character and reservoir formed rule for Xujiaweizi fault depression
..... *Tang Jianren et al* (345)
- Record and study of exploded wavelet signal by explosive *Wang Enhua et al* (352)
- Development mechanism of shallow multi-refraction and approach
to seismic data acquisition *Wang Changchun and Xiong Jinliang* (364)
- Seismic identification and description technique for shale-fractured reservoir
in Luoia area of Shengli oilfield *Su Chaoguang et al* (371)
- Identification of micro-fault and sand body by using coherence technique
and 3-D visualization *Wang Zhijun and Huang Junbin* (378)
- Contributors (382)

No. 4

- Development and application of special source in seismic exploration
..... *Zhao Diandong et al* (383)
- Seismic method for using full-azimuth P-wave attribution to detect fracture
..... *Qu Shouli et al* (390)
- Generalized high-order screen method for pre-stack depth migration by
double-square-root *Sun Peiyong et al* (398)
- Finite-difference pre-stack depth migration with errors compensation
..... *Cheng Jiubing et al* (408)
- Short-frequency time transform and seismic signal analysis *Cai Xiling et al* (414)
- Finite-difference forward modeling of three-component records with high
precision in 3-D orthorhombic anisotropic media *Zhang Wensheng et al* (422)
- Multiscaled-combined inversion problem based on convolution model
..... *Ma Jianwei et al* (433)
- Analysis for prefiltering parameters of apparatus *Ling Yun* (438)
- Non-seismic exploration techniques aimed at different oil-gas exploration stage
..... *Jia Jingdou* (444)
- Approach to oil-gas bearing controlling factors of Donghe sandstone traps
in Tazhong area of Tarim Basin *Zhang Zhensheng et al* (451)

• EXPERIENCE •

- Refraction seismic interpretation method in CMP domain and its application case
..... *Zhang Jianzhong et al* (459)

Effects of temperature and pressure on seismic monitoring for waterflooding	<i>Yun Meihou</i> et al (466)
Study of acquisition method in marine beach area	<i>Yu Zhihe</i> et al (471)
Surface-consistent phase correction for reflection wave	<i>Gao Shaowu</i> et al (480)
Analysis of reflection travel-time in transversely isotropic media	<i>Yuan Shujin</i> et al (488)
A discussion on method for improving synthetic seismogram	<i>Chen Yuming</i> et al (495)
• SUMMARIZATION •	
Study of oil-gas migration by using seismic exploration technique	<i>Li Dawei</i> et al (499)
Challenge and opportunity in process of development of third generation of oil-gas exploration data interpretation system	<i>Chen Maoshan</i> (508)
Contributors	(516)
No. 5	
Pre-stack depth migration of VSP data and stereoscopic seismic imaging	<i>Wang Huazhong</i> et al (517)
Wave equation pre-stack depth migration for common offset gathers	<i>Cheng Jiubing</i> et al (526)
Labeling method for subtle horizon of high-resolution seismic data in Chexi area	<i>Guo Dong</i> et al (533)
Prediction of thin and interbedded reservoir parameters based on radial Gauss networks	<i>Gao Meijuan</i> et al (540)
2-D random media and wave equation forward modeling	<i>Xi Xian</i> et al (546)
Comparative mapping method for 2-D seismic migration section	<i>Gu Xianjue</i> et al (553)
Offshore multi-wave seismic technique and its application in exploration of gas reservoir with high temperature and high pressure	<i>Zhang Shulin</i> (563)
Surface model correction by wave-field continuation	<i>Li Luming</i> et al (572)
Analysis of charge size and charge type	<i>Ling Yun</i> (584)
Geology-physical basis of studying carbonate-fractured reservoir	<i>Huang Handong</i> et al (591)
• EXPERIENCE •	
Spectrum-modulated technique	<i>Li Guofa</i> (597)
Oil-gas exploration on slope	<i>Li Huoche</i> et al (602)
Cross-hole seismic test of Π method and analysis of its result in Liaohe oilfield	<i>Zhang Lixin</i> et al (611)
Study of Mesozoic-Paleozoic structure mapping method in Jiangsu area and its application effects	<i>Yang Dezhou</i> et al (618)
Response characteristics of sequence boundary in geophysical data	<i>Sun Zhihua</i> et al (626)
Application of logging-constrained inversion in reservoir description	<i>Xiao Yang</i> et al (633)
Selection of parameter for coherence technique and its effect analysis	<i>Sun Yimei</i> et al (640)
Contributors	(654)

No. 6

- Generalized screen propagator and its application in seismic wave migration imaging
..... *Wu Rushan, Jin Shengwen and Xie Xiaobi* (655)
- Application of DMO processing technique for any $V(z)$ in deep seismic data
processing in Dagang Oilfield *Li Guofa et al* (665)
- Study of universal Kriging interpolation for super-giant data volume
..... *Niu Wenjie and Yang Qin* (672)
- Tomographic method for cross-hole seismic waveform by wavelet in a multi-scale
..... *Pei Zhenglin and Yu Qinfan* (680)
- Prestack depth migration method based on Rytov approximation
..... *Chen Shengchang, Cao Jingzhong and Ma Zaitian* (690)
- Study and application of Fourier finite-difference depth migration method
..... *Kuang Bin et al* (698)
- Using orthogonal polynomials for eliminating white noise
..... *Yang Yunfei, Wang Huazhong and Cao Jingzhong* (704)
- Methods of comprehensive geophysical data for prediction of porosity and
analysis of its application *Wang Yonggang and Yue Youxi* (707)
- A special fault-combined pattern in Wumaying area *Lu Gangchen et al* (716)
- Effects of geophone pattern on seismic data quality
..... *Qiao Dajun, Meng Xiangshun, Zhang Yubin and Wang Xiaoyan* (723)
- EXPERIENCE •
- Spectrum-constrained deconvolution and its application
..... *Guo Xiangyu, Wei Xiucheng and Zhou Xingyuan* (729)
- Method of frequency-divisional residual statics and its application analysis
..... *Guo Shuxiang* (735)
- Integrated study for processing and interpretation of complicated fault block
in SXF area, GY depression *Ju Chunrong* (740)
- Cross-hole seismic method and effect in LuoJia area *Zhou Jianyu et al* (745)
- Control on oil and gas accumulation by gravitational detachment fault
in west slope of Shulu *Wu Yaohui, Tian Jianzhang and Wang Wenjun* (754)
- Approaching of seismic imaging in deep and complicated structure of
Mazhai area, Shengli Oilfield *Fu Jinhua and He Ruiwu* (761)
- GPS base line calculation and its quality control *Guo Haiyang* (773)
- Contributors (784)
