

OIL GEOPHYSICAL PROSPECTING

Vol. 37 No. 1~6 2002

CONTENTS

No. 1

- Intensity and efficiency of noise attenuation and amplitude fidelity Zhang Baojin et al (1)
- Wave equation prestack depth migration on common-offset by Green
function method Chen Shengchang et al (6)
- Iterative ray-tracing method segment by segment under 3-D construction Gao Ergen et al (11)
- Multiple attenuation of seismic data from South China Sea
by using beam-forming filtering method Hu Tianyue et al (18)
- Inversion of anisotropic parameters in HTI medium by genetic algorithm Zhang Shijun et al (24)
- Seismic trace interpolation with generalized spectral decomposition Wang Jianli et al (29)
- Theoretic analysis of delayed blast Hu Lixin et al (33)
- Measurement and rule of velocity and attenuation for P-wave in core sample of water-saturated
sand in a condition of room temperature and confined pressure Xu Guoming et al (39)
- A method for improving precision of log model-building Liu Tangyan et al (44)
- Altun fault system and formation and evolution of Tazhong structural belt Kang Nanchang (48)

• EXPERIENCE •

- A method for building of seismic velocity field and structure mapping
by variation in velocity Ma Haizhen et al (53)
- An improved algorithm for picking up seismic first arrivals
by using fractal dimension Han Xiaojun et al (60)
- Application of fractal edge detection in fracture prediction Huang Handong et al (65)
- Effects of fracture anisotropy on seismic P-wave stack data
..... Fan Guozhang and Mou Yongguang (69)
- Oil and gas prediction by neural networks with structure-risk-minimum ... Zhang Xiangjun et al (73)
- Approaching a method for prediction of rich in oil-gas area
in thin-bedded limestone Xu Hongmei (77)
- Predicting method for reservoir based on similar background and its effects
..... Wang Enhua and Wan Zhonghong (85)

• SUMMARIZATION •

- Numeric oilfield; integrating data, information, software and knowledge of oilfield
..... Chen Qiang and Wang Honglin (90)

• PERSONAGE •

- Geophysicist Chen Xiaohong (insert 1)
- Contributors (98)

No. 2

- Analysis of tube wave in cross-well seismic technology He Xinghua (99)
- A NMO scheme for complicated surface Wang Youxin (105)
- Separating and suppressing multiples by sparse solution of parabolic Radon transform
..... Zhu Shengwang et al (110)
- Trial of application of odd-fractal inversion technology in reservoir description
..... Chen Guangjun et al (117)
- Surface-consistent decomposition and its components analysis Li Shengjie et al (122)
- Analysis of spherical projection technology in six-arm dipmeter processing Gao Xingjun et al (129)

Study for evolution of CB30 buried hill structure and rule of oil-gas accumulation	<i>Tan Mingyou et al</i> (134)
One-dimensional magnetotelluric(MT) inversion by “forward modified method”	<i>Su Zhuliu et al</i> (138)
Study for long-distant and far-referential MT	<i>Chen Qingli et al</i> (145)
Numerical study for SKC-B big,numeral control and full-wave logger	<i>Shen Jianguo et al</i> (149)

• EXPERIENCE •

Prestack wave equation datum correction from non-flat surface with finite-difference scheme	<i>Yang Kai et al</i> (154)
Study for application of image edges detection to thin-layer recognition	<i>Tang Xianghong et al</i> (163)
Sensitivity analysis of AVO inversion in a case of multi-wave amplitude compensation in viscoelastic medium	<i>Gu Hanming et al</i> (166)
Application of kernel Fisher discriminanting technique to prediction of hydrocarbon reservoir	<i>Xu Jianhua et al</i> (170)
Discussion on quantitative prediction of deep volcanic reservoir	<i>Li Yanming et al</i> (175)
Application of prestack depth migration in Gudao area by Kirchhoff integration	<i>Dong Chenqiang et al</i> (180)
Method for prediction of Es ₄ member reservoir and its application in Wangxie 119 area	<i>Wang Xinzheng et al</i> (185)
Appreciation of land converted wave quality in China	<i>Liu Yang</i> (191)

• SUMMARIZATION •

Continental scientific drilling and Chinese scientific deep drilling engineering	<i>Yang Wencai</i> (196)
--	--------------------------

• PERSONAGE •

Geophysicist <i>Sa Liming</i>	(insert 1)
Contributors	(200)

No. 3

Post-stack attenuation of near-surface scattered wave	<i>Guo Xiangyu et al</i> (201)
A self-adaptive method for multiple suppression	<i>Zhang Jinqiang and Mu Yongguang</i> (209)
Simulated imaging of complex strata	<i>Chen Aixin</i> (216)
Rugged surface oriented hybrid pre-stack depth migration	<i>Wang Chengxiang et al</i> (219)
The same start of DMO and prestack time migration	<i>Wang Huazhong et al</i> (224)
Producing synthetic seismogram using difference method of Stokes equation	<i>Liu Cai et al</i> (230)
Cross-hole seismic waveform tomography by wavelet multiresolution evolutionary programming algorithm	<i>Pei Zhenglin et al</i> (237)
Research on theoretic foundation of structure-stress interpretation with seismic data	<i>Xiao Jianhua et al</i> (243)
Analyzing characters of formation attenuation on seismic records	<i>Li Shengjie et al</i> (248)
Facies-control neural network model for prediction of inter-well parameters	<i>Tan Chengqian et al</i> (254)
Inversion of nuclear magnetic resonance logging data based on regression M-estimation	<i>Weng Aihua et al</i> (258)

• EXPERIENCE •

Study of processing method for transient electromagnetic data by AB-s configuration	<i>Su Zhuliu and Hu Wenbao</i> (262)
Research on P-wave theory in VTI medium and its application	<i>Research group for 3-D processing and interpretation integrated method</i> (267)
Improvement of method for pre-stack “deletion-fitting” noise suppression and its application	<i>Wang Di et al</i> (276)

Effect of waterflood development on velocity and density of reservoir rock	<i>Yun Meihou and Guan Zhining</i> (280)
Identification of lithologic traps in Junggar Basin by comprehensive geophysical method	<i>Jin Jun et al</i> (287)
Distribution of volcanic rock and its rule of reservoir on Changling Faulted Depression, South of Songliao Basin	<i>Cai Xianhua</i> (291)
Determination of ghosting interface and its application in seismic prospecting	<i>Lü Gonghe</i> (295)

• REVIEW •

Review of 2001 Year's <i>OGP</i>	<i>Wang Xiwen</i> (300)
--	-------------------------

• PERSONAGE •

Geophysicist <i>Yin Xingyao</i>	(insert)
Contributors	(306)

No. 4

Application of parallel 3-D pre-stack depth migration to seismic data from buried hills in ZX area	<i>Kuang Bin et al</i> (307)
Regularization of pre-stack seismic data	<i>Xin Kefeng et al</i> (311)
Application of modular characteristic points of wavelet transform to detecting margin of seismic data	<i>Song Weiqi et al</i> (318)
On interpretation of fault reflection in seismic exploration	<i>Xiao Jianhua and Peng Suping</i> (322)
Research on algorithm of seismic coherent cube based on wavelet transtorm ...	<i>Wang Xiwen et al</i> (328)
A fast pre-stack depth migration on areal shot records	<i>Zhang Shulun and Sun Peiyong</i> (333)
A method for building a model in closed structure	<i>Jiang Xianyi et al</i> (339)
A method for prediction of oil and gas in Carboniferous reservoir, Tahe Oilfield	<i>Tang Jianming</i> (343)
Optimum inversion of sophisticated gravitational and magnetic anomalies by multi-stage decision	<i>Liu Tianyou et al</i> (349)
Geologic structural feature in west of Zenmu basin, Nansha sea area	<i>Chen Ling</i> (354)

• EXPERIENCE •

Study of AVO theory and its application in VTI medium	<i>Research Group of Method for Yangwu 3-D Integrating Processing into Interpretation</i> (363)
Approaching ability of using well-log-constrained inversion to solve geologic problems	<i>Shen Caiyu et al</i> (372)
Applied potential of cross-hole seismic technology in development of oilfield	<i>Song Jianguo</i> (377)
Seismic predicting technology of offshore gas reservoir and its application	<i>Zhang Shulin et al</i> (382)
Application of prediction by well-constrained seismic pressure in rolling exploration and development	<i>Wang Xingling et al</i> (391)
Analytic probabilistic algorithm of calculating regional oil resource extent and its application in north margin of Chaidamu Basin	<i>Liu Xiaodong and Xu Jingzhen</i> (395)
Application of sparse pulse and inversion based on model in rolling exploration and development of sand body reservoir in Es ₄ member, Wangjiagang area	<i>Liu Chengzhai et al</i> (401)
Study of seismic inversion by geologic statistics and its application in sealing action of Mingfeng fault zone	<i>Shi Wendong et al</i> (407)

• SUMMARIZATION •

Review of common focus point (CFP) imaging technology	<i>Yu Guozhu et al</i> (412)
Methods and development of integrating seismic data in reservoir model-building	<i>Yin Xingyao and Liu Yongshe</i> (423)

• PERSONAGE •

Geophysicist <i>Qu shouli</i>	(insert 1)
-------------------------------------	------------

Contributors	(432)
--------------------	-------

No. 5

Research on analyzing and monitoring method for 3-D seismic data <i>Research group for Yangwu 3-D processing and interpretation integration</i>	(433)
Dispersive character of wave excited by dipole acoustic source	<i>Li Hesheng and Li Ning</i> (441)
Analysis on prospecting effects of offshore 4-C seismic structure	<i>Zhang Shulin et al</i> (446)
Two point ray tracing with minimum time	<i>Chen Yuming et al</i> (455)
Separation of pre-stack seismic surface wave and signal reconstruction by wavelet package	<i>Wang Zhenguo et al</i> (460)
Numerical simulation by staggered grid method for high frequency limited BISQ equation	<i>Yang Kuande et al</i> (463)
Automatic refraction static correction in common offset domain	<i>Mao Jingen et al</i> (469)
Random noise suppression of seismic signal using orthogonal multi-wavelets	<i>Wu Aidi and Cao Siyuan</i> (473)
Identifying and predicting technology of deep volcanics gas reservoir in north of Songliao basin	<i>Li Ming et al</i> (477)
Eroded valley-topogenetic lowstand fan sedimentary system in north slop of Biyang depression and its significance in oil and gas exploration	<i>Yang Daoqing et al</i> (485)

• EXPERIENCE •

Inversion of reservoir parameters by integrative application of seismic attribution and logging data	<i>Song Weiqi et al</i> (491)
Analyzing importance of structural analysis in tapping latent power of matured oilfield — exploration case in Kongdong area	<i>Lu Gangchen et al</i> (495)
Research on prediction of Guangrao buried hill type reservoir	<i>Wang Zengming</i> (502)
Application of integrative inversion technique to predict carbonate reservoir	<i>Wang Jian et al</i> (506)
Application of geophysical prospecting technique to oil-gas exploration in Yanqi basin and its effects	<i>Qiu Ronghua and Zhao Liang</i> (511)
2-D inversion of magnetotelluric (MT) sounding data by dimension-descending approaching method	<i>Su Zhuliu and Hu Wenbao</i> (516)
Realizing seismic detection of gas reservoir by using non-linear mapping to distinguish model	<i>Han Wengong et al</i> (524)
Discussion on problem of high-precision seismic exploration and its countermeasure analysis	<i>Hu Zhongping and Sun Jianquo</i> (530)
Study of method for prediction of formation porosity by wave impedance inversion	<i>Ma Ruhui and Zhang Ping</i> (537)
Seismic object processing aimed to predict volcanic and the new technology of volcanic reservoir prediction	<i>Li Yanli et al</i> (541)

• PERSONAGE •

Geophysicist <i>Gan Lideng</i>	(insert 1)
Contributors	(548)

No. 6

Design method for setup of 3-D,3-C seismic exploration	<i>Liu Yang et al</i> (549)
Study of 3-D seismic physical model	<i>Wei Jianxin et al</i> (556)
Study on effects and precision of 3-D seismic physical model technique	<i>Di Bangrang et al</i> (562)
Applied study and effect of high-resolution seismic exploration in east of Qaidam Basin	<i>Wang Ziming et al</i> (569)
Seismic wave AVO and formation lithology analysis	<i>Zhang Guangjuan and Hu Tianyue</i> (578)
Phase-shift time migration of common-offset sections	<i>Zhang Shulun et al</i> (585)
Non-linear process control for numeric solution of geophysical inversive problem	

..... Shi Yumei et al(589)	
Noise attenuation using minimum smooth filter based on wavelet transform	
..... Wang Zhenguo et al(594)	
Study on correcting methods matching seismic data with sonic logging data	 Yun Meihou et al(601)
GA-BP optimization of seismic attribution	 Wang Yonggang et al(606)

• EXPERIENCE •

An interactive interpretation system in magnetotelluric sounding based on VC platform	
..... Zhang Xiang et al(612)	
Velocity-scanning analyzed technique in CRP gather of 3-D prestack depth migration and its application	 Wang Di et al(615)
Prediction of H ₈ reservoir in Shan-231 well zone, Ordos Basin.	 Li Laiyun and Heng Weimin(620)
Application of converted wave in study of fractured shale	 Ding Wei et al(626)
Matching study on time-lapse seismic data volume and its analysis	 Tian Chunzhi et al(635)
The technology of making high-precision synthetic seismogram	 Sun Zhentao et al(640)
Fast iterative inversion of multi-array induction log data	 Wang Hongnian and Chimedsurong(644)

• SUMMARIZATION •

Interpretation of high-resolution seismic data	 Ji Youxian(653)
