

OIL GEOPHYSICAL PROSPECTING

Vol. 38 No. 1~6 2003

CONTENTS

No. 1

ABSTRACTS (1)

• ACQUISITION TECHNIQUE •

Progress of research on 3-component (3-C) data acquisition technique on mountain area
..... *Tang Jianhou, Li Yalin and Zhang Xiaobin et al*(1)

A new method for seismic exploration of free arrangement
..... *Liu Taifeng, Ning Shunian and Kang Junjian*(5)

Seismic acquisition QC under complicated geologic condition *Cui Xingbao*(11)

Discussion on reasonable application of seismic exploration technique in exploration
and development of Yanqi basin *Sun Yaohua*(17)

• PROCESSING METHOD •

Estimation of large residual statics in two steps *Jing Xili* (22)

3-D seismic trace interpolation in $f-k$ domain
..... *Zhang Junhua, Tong Zhaoqi and He Chaoguan et al*(27)

Absorbing boundary condition for acoustic wave equation by perfectly matched layer
..... *Wang Shoudong*(31)

Knowledge of RG line and datum of time-depth conversion
..... *Lü Huantong, Zheng Hongming and Zhao Feng et al*(35)

• COMPREHENSIVE RESEARCH •

Prediction of superpressure stratum using inversion of seismic while drilling (SWD) data
..... *Zhu Jian and Gao Shaoyan*(38)

Selection of first-break timing in using transmitting method for measuring sonic velocity
..... *Shen Jianguo*(44)

Research on non-linear prediction of fracture of oil/gas reservoir and its application
..... *Li Zhengwen and Li Qiong*(48)

Study of lithologic characteristic and layer-labeling technique in reservoir prediction
..... *Zhou Yubing, Dong Qiaoliang and Zhang Yubin*(53)

Prediction of reservoir by laterally regional amplitude difference for fractured carbonate
..... *Long Jiandong, Xu Anna and Li Ming*(58)

• SEISMIC AND GEOLOGY •

Mechanism of contributing factor for Bohai Bay basin and appreciation of oil/gas
..... *Jia Zhibin, Tian Xinqi and Meng Xiangshun et al*(62)

A few examples of lacustrine retrogradation reflection
..... *Pu Renhai, Du Jinhu and Cui Yongqian et al*(67)

Knowledge of several special representative features of normal fault on seismic section
..... *Dong Shuzheng, Lu Gangchen and Ma Jun et al*(72)

• EXPERIENCE •

Research on gas-bearing prediction in sandstone reservoir with low-impedance,

Sulige gas field	Shi Songqun and Zhao Yuhua(77)
Coding system of geophysical/geochemical survey line and cases	Zhang Jiaodong, Liu Deliang and Yang Xiaoyong et al(84)
Discussion on seismic acquisition method and reservoir prediction technique	Pan Zufu(88)
• NON-SEISMIC SURVEY •	
Application of singular value decomposition (SVD) in solution of T_2 relaxation spectra from nuclear magnetic resonance (NMR) log data	Wang Caizhi and Shang Weizhong (91)
Several questions need to pay attention to on balancing to GPS net	Guo Haiyang(95)
Contributors	(112)
No. 2	
ABSTRACTS	(1)
• ACQUISITION TECHNIQUE •	
Study on explosion effects of explosive source in soil medium	Lü Shuran et al(113)
Design of object-oriented seismic acquisition technique and its application effects in SK area	Duan Weixing et al(117)
Discussion on seismic acquisition in an area having lower S/N ratio and strong linear interference	Bai Xuming et al(122)
Characteristic analysis of receiver-array in complicated surface conditions ...	Wang Yonggang et al(126)
• PROCESSING METHOD •	
AVO analysis for P-SV wave	Sun Pengyuan et al(131)
A study on noise-suppression method in f - x domain	Kang Ye et al(136)
CFP method for velocity model inversion	Wang Chengxiang et al(139)
A new method for calculation of elastic wave impedance	Ni Yi(147)
Comparison between normal moveout (NMO) methods for long-offset seismic data	Xue Gang et al 151)
Common reflection surface stack method based on multi-level optimization of parameters and its application	Li Zhenchun et al(156)
• COMPREHENSIVE RESEARCH •	
A method for automatic recognition of high-resolution sequence-stratigraphy and its realization on computer	Wu Yijie et al(162)
Common action of aligned fracture and interface on elastic wave	Zhang Guangying et al(168)
Meander channel sandstone reservoir pattern on slope belt and its description method	Wei Hongmei et al(173)
Application of geophysical and geochemical technique in buried-hill exploration	Shi Haoguo et al(178)
Using seismic attributions for quadric programming inversion of porosity parameter	Li Peiming et al(182)
Application of in interpretation technique structural-lithologic composite reservoir in Yingtai area and its effects	Sun Yan et al(185)
• SEISMIC AND GEOLOGY •	
Characters of reverse and its forming mechanism in late of fault depression in Songliao basin	Fang Limin et al(190)
Character and distribution of seismic facies favorable for oil/gas accumulation in	

Middle-Upper Ordovician, Tazhong area	<i>Li Hongge et al</i> (194)
• EXPERIENCE •	
Model-constrained 3-D first break refraction static correction	<i>Li Peiming et al</i> (199)
Study on processing method for seismic data with low S/N ratio in Tarim basin	<i>Hu Pengfei et al</i> (203)
• NON-SEISMIC SURVEY •	
High-resolution inversion and its application in nuclear magnetic resonance (NMR) logging data processing	<i>Weng Aihua et al</i> (208)
2-D inversion of magnetotelluric (MT) multi-parameters with topography using fast simulated annealing	<i>Yang Hui et al</i> (213)
Contributors	(220)
No. 3	
ABSTRACTS	(1)
• ACQUISITION TECHNIQUE •	
Design principles of seismic line layout and acquisition parameters on Tarim mountain	<i>Yang Juyong et al</i> (221)
Ocean Bottom Cable (OBC) acquisition method in southern Laopu area	<i>Han Liqiang et al</i> (226)
Some experiments and analysis of seismic study on near-surface	<i>Wang Junru et al</i> (231)
• PROCESSING METHOD •	
Application of pre-stack depth migration integrative processing techniques in study of Nanmeng buried-hill reservoir, Jizhong Oilfield	<i>Liu Jun et al</i> (237)
Self-adaptive coherent noise attenuation technique	<i>Gao Shaowu et al</i> (242)
Minimum dispersion algorithm by finite-difference numeric modeling and its applications	<i>Cai Qixin et al</i> (247)
Seismic forward modeling by arbitrary difference precise integration	<i>Wang Runqiu et al</i> (252)
• COMPREHENSIVE RESEARCH •	
Using multivariate seismic attributions to predict reservoir information	<i>He Bizhu et al</i> (258)
Multi-well constrained velocity model-building method and its application	<i>Wang Xiwen et al</i> (263)
Application of amplitude tuning in surveying geologic target thickness less than 1/4 wavelength	<i>Ling Yun Study Group</i> (268)
Study of general effective medium HB resistivity model in mixed shaly sands	<i>Song Yanjie et al</i> (275)
Concept and application of seismic cycle characteristics	<i>Zhang Junhua et al</i> (281)
Fractured reservoir detection by bispectrum	<i>Chi Xingang et al</i> (285)
• LOGGING TECHNIQUE •	
Identifying condensate gas-oil ratio from well logging	<i>Gao Chuqiao et al</i> (290)
Study of well logging method for reservoir with low resistivity in Mazhai Oilfield	<i>Ren Guanghui et al</i> (294)
• SEISMIC AND GEOLOGY •	
Control role of lateral oil migration along fault on Mesozoic reservoir-forming of Kongxi fracture belt	<i>Lu Gangchen et al</i> (297)
Preliminary probe of application of sequence-stratigraphy technology	<i>Sun Zhihua et al</i> (303)
• EXPERIENCE •	
Test and analysis of geophone's free frequency in seismic acquisition	<i>Wang Zengming</i> (308)

Application of image processing techniques to geophysics	Zhang Lili et al(317)
• NON-SEISMIC SURVEY •	
A effective 1-D MT direct inversion scheme	Chen Qingli et al(324)
Analysis of rock pore throat structure with NMR spectra	Liu Tangyan et al(328)
• SUMMARIZATION •	
Progress and prospect of geophysical exploration technology in China	Xiong Zhu(334)
Contributors	(340)
No. 4	
ABSTRACTS	(1)
• ACQUISITION TECHNIQUE •	
Study and application of multi-level-delayed explosive source	Xu Shuhe et al(341)
Application and study on wide-azimuth seismic exploration	Ling Yun Study Group(350)
Deep 3-D seismic data acquisition techniques	Zhang Xiuhong et al(358)
Numerical simulation of air-gun array wavelet	Chen Haolin et al(363)
2-D seismic data acquisition in Hefei basin	Feng Gang et al(369)
• PROCESSING METHOD •	
Background velocity replacement and reconstruction of velocity field by wavefield continuation	Cui Xingfu et al(375)
Network-based seismic data processing:from cluster computing to grid computing	Wang Honglin(381)
Radon projection 3-D prestack time migration	Huang Xinwu et al(387)
Inversion of postack time-lapse seismic data by modified simulated annealing algorithm	Li Jingye et al(392)
• COMPREHENSIVE RESEARCH •	
Acquiring interval velocity by joint inversion of travel-time and wave impedance	Zou Qiang et al(396)
Prediction of micro-fractures in reservoir	Liang Bing et al(400)
Lateral prediction of complex oil-gas reservoir	Zhu Qingzhong et al(405)
Dynamic stress-strain response in saturated rocks under cycling load	Chen Yunping et al(409)
Discussion on near-surface characters and structures in complex area of western china	Xia Zhu et al(414)
• LOGGING TECHNIQUE •	
Contributing factor of sandstone fracture and its integrated identifying technology for regular logging data	Zhou Cancan et al(425)
• EXPERIENCE •	
Using multi-wave data to detect fractures	Zhang Xiaobin et al(431)
Non-linear constrained inversion of seismic data	Jiang Liang et al(435)
• NON-SEISMIC SURVEY •	
Effect of pole-pole potential error on apparent resistivity	Wu Xiaoping et al(439)
Transform from transient electro-magnetic (TEM) electric section into pseudo-seismic section	Xue Guoqiang et al(444)
• SUMMARIZATION •	
Progress and prospect of geophysical exploration technology in China	Xiong Zhu(447)

Contributors (462)

No. 5

ABSTRACTS (1)

• ACQUISITION TECHNIQUE •

Double focusing method for 3-D geometry-optimized design *Di Bangrang et al*(463)

High-resolution seismic data acquisition techniques in Baobei area, Yanqi Basin
..... *Wang Dezhi et al*(470)

Algorithmic analysis of 3-D first break refraction static corrections *Fan Hua et al*(475)

• PROCESSING METHOD •

Numerical modeling of P-wave and S-wave separation in elastic wavefield *Ma Detang et al*(482)

Method of static corrections under complex near-surface conditions *Wang Zhenhua et al*(487)

Study of poststack relative preserved amplitude processing *Lin Yung Research Group*(501)

Prestack depth migration by surface-controlled illumination of multi-geologic targets
..... *Chen Xiumei et al*(507)

Application of zero-offset seismic trace fitting in time-frequency domain
to marine high-resolution seismic data processing *Wen Shuliang et al*(512)

• COMPREHENSIVE RESEARCH •

Fracture inversion using P-wave reflection data and cases *Ma Zhonggao*(517)

Application of joint time-frequency distribution and its attribution *Yin Xingyao et al*(522)

Integrative interpretation of minor fault and its application in Yingtai area *Wu Qinglong et al*(527)

Study on method of lithologic trap reservoir description and its application *Liu Jinping et al*(531)

Application of seismic constrained model-building technique to reservoir modeling
..... *Yang Yaozhong et al*(535)

• LOGGING TECHNIQUE •

Influence of microannulus' thickness on capacity of acoustic wave-logging tool *Diao Shun et al*(540)

Experimental research on electrical properties of shaly sand under different salinity
..... *Deng Shaogui et al*(543)

• SEISMIC GEOLOGY •

Seismic identification of meandering channel sedimentary subfacies *Yu Jianguo et al*(547)

Es₃ salt-structural types of Dongpu depression and seismic identification *He Yawei et al*(552)

• EXPERIENCE •

Complete sets of interpretation technology for lithologic reservoir *Wang Ping et al*(557)

• NON-SEISMIC SURVEY •

Using discrete Fourier transform for interpolation of 3-D MT data *He Zhanxiang et al*(561)

• SUMMARIZATION •

Progress and prospect of geophysical exploration technology in China *Xiong Zhu* (565)

Contributors (582)

No. 6

• ACQUISITION TECHNIQUE •

Analysis of explosive effects of dynamite source *Qian Rongjun*(583)

Energy shielding action of shallow strong reflector *Wang Jianhua* et al(589)

• PROCESSING METHOD •

Full-wave field modeling by slowness method and realization of horizontal slowness integration
..... *Zhang Fanchang* et al(597)

Study of NMO correction method by optimized sixth-order term *Hu Zhongping* (603)

A new method of 3-D refracted first break static correction *Zhang Jianzhong* et al(608)

A new method for determination of floating datum in static corrections *Lin Boxiang* (611)

Seismic trace interpolation by using L_1 norm to calculate time-difference between traces
..... *Lü Xiaowei* et al(618)

• COMPREHENSIVE RESEARCH •

Theoretical study of detectable cavern-fractured reservoir in weathered darst of deep carbonatite
..... *Yao Yao* et al(623)

Study of S-wave test and measurement technique in laboratory *Wei Jianxin* et al(630)

Tomographic inversion for 3-D complex near-surface model and static corrections
..... *Li Luming* et al(636)

Study on application of basic seismic attributes in interpretation of depositional environment
..... *Ling Yun* et al(642)

χ^2 distribution processing of deep seismic reflection in north of songliao basin and its deep geologic
feature *Chen Zhide* et al(654)

• LOGGING TECHNIQUE •

Measuring directivity of phased-array acoustic transmitter in acoustic log *Chen Xuelian* et al(661)

• SEISMIC GEOLOGY •

Role of faulted structure in oil-gas accumulation;Case of Quti Oilfield,Jiyang Depression
..... *Sui Shuling* et al(666)

Determination of Weizhou-Shigouyi detachment structure and its geological meaning
..... *Wang Feng* et al(671)

• EXPERIENCE •

Study on application of velocity-field model-building method *Shao Yu* et al(675)

Application of joint inversion of gravity,magnetic,electric and seismic data to exploration in
Hefei Basin *Jia Hongyi* et al(680)

Application of seismic interpretation technology in N-50 well zone *Sun Zhihua* et al(687)

• DISCUSSION AND CONTROVERSY •

Difference of wave-equation between exploration seismology and development seismology as
viewed from multi-phases medium *Yu Wenhui* et al(690)

• SUMMARIZATION •

Progress and prospect of China ceophysical prospecting technology *Xiong Zhu* (701)

Contributors (707)
